Natural & Amazing Results

Glamore World is a leading aesthetics clinic specialising in anti-ageing techniques. We can make you feel years younger with advanced aesthetics, facial rejuvenation & non-surgical procedures.

We pride ourselves on a natural look with over 17 years experience in aesthetics and a passion for using the latest techniques of non-invasive procedures for skin rejuvenation.

An Experienced Team

Our experienced team has over 17 years of experience in the industry and is dedicated to providing the highest quality of care and service to each and every one of our clients. We offer a range of non-surgical treatments, including injectables, laser treatments, and skincare services, all tailored to meet the unique needs of each individual.

Our goal is to help our clients look and feel their best, with results that are both subtle and transformative. Trust our experienced team to help you achieve a refreshed, youthful appearance in a safe and professional setting.

SPMU – Semi-Permanent Makeup

Semi-permanent makeup is a cosmetic technique that involves depositing pigments under the skin to enhance the appearance of features such as eyebrows, lips, and eyelids. The benefits of semi-permanent makeup include saving time and effort in daily makeup application, as well as maintaining a consistent, polished look throughout the day. It can also help those with conditions such as alopecia or scarring, by creating the illusion of natural-looking hair or skin.

P.O.A

SCAR CAMOUFLAGE FROM

£100

Botox

Botox is a cosmetic treatment that involves injecting a purified form of the botulinum toxin into specific muscles to temporarily paralyze them. The benefits of Botox include smoothing out fine lines and wrinkles on the face, particularly around the forehead, eyes, and mouth, resulting in a more youthful and refreshed appearance. It can also help to alleviate other conditions such as chronic migraines, excessive sweating, and muscle spasms. Botox treatments are minimally invasive, with little to no downtime required, making it a convenient option for those with busy schedules. Overall, Botox is a safe and effective cosmetic treatment

Aesthetic Dermal Fillers

Dermal fillers are a cosmetic treatment that involve injecting a gel-like substance under the skin to add volume and smooth out wrinkles and fine lines on the face. The benefits of dermal fillers include restoring lost volume and contouring to areas of the face that have lost their youthful appearance due to aging, sun damage, or other factors. They can also help to enhance features such as the lips, cheeks, and chin, providing a more balanced and symmetrical appearance.

RADIESSE 1.5 ML	£400 2 VIALS £700

Chemical Skin Peels

Chemical skin peels are a cosmetic treatment that involve applying a chemical solution to the skin to remove the outermost layers and promote cell turnover, resulting in smoother, more even-toned, and rejuvenated skin. The benefits of chemical skin peels include reducing the appearance of fine lines, wrinkles, and age spots, as well as improving skin texture, tone, and clarity. They can also help to reduce acne and acne scarring, and improve the overall health and radiance of the skin.

Advanced Facial Lifting Technologies

Non-surgical facelifts are a cosmetic treatment that involves using various techniques to lift, tighten, and rejuvenate the skin without the need for surgery. The benefits of non-surgical facelifts include restoring the skin's natural elasticity and firmness, reducing the appearance of wrinkles and fine lines, and improving skin texture, tone, and radiance. Non-surgical facelifts can also help to lift sagging skin, contour the jawline, and enhance facial volume in areas that have lost fullness due to aging.

Intimate Waxing Treatments

Waxing is a hair removal treatment that involves applying warm wax to the skin and removing it along with the unwanted hair. The benefits of waxing treatments include longer-lasting results compared to other hair removal methods, such as shaving or depilatory creams, as waxing removes hair from the root. This can result in a smoother and softer skin texture, and fewer ingrown hairs. Regular waxing can also lead to hair regrowth that is thinner and less dense over time.

Fat Free - Non-Surgical Liposuction

Fat freezing involves freezing and destroying fat cells in targeted areas of the body. The benefits of fat freezing include reducing the amount of stubborn fat in areas such as the abdomen, love handles, thighs, and arms, resulting in a slimmer and more contoured, firmer appearance. Fat freezing treatments require little to no downtime, are a more comfortable and safer alternative to liposuction and results can be seen gradually over several weeks or months. Clients also see reductions in cellulite.

Treatments

£680

Skin HiFU Treatments

Skin HiFU uses ultrasound waves to stimulate collagen production and promote skin tightening and lifting. Skin HiFU improves the appearance of wrinkles, and sagging skin, resulting in a more youthful and rejuvenated appearance. It can also help to lift and contour the skin on the face, neck, and décolletage, providing a more defined and sculpted appearance. Results of Skin HiFU treatments can continue to improve gradually over time, as collagen production increases in the treated areas.

Treatments

EYE LIFT	£250
JAW LIFT	£275
